

# Fishitas

Approximately \$1900 could provide fingerlings (baby fish) and pond management in one village in Bangladesh for one year. This poster represents one year (12 months). So, each jigsaw part represents **three months** costing \$475 each.

Cut the four sections out and paste them onto the template as the money is raised for each part.

This is a practical, symbolic exercise that will bring your fundraising for Caritas Australia to life. Please note that all funds raised will go towards general Caritas Australia programs.
