Sally's Story
Sally, 13, from remote northern Tanzania, faced poverty, unsafe water and poor sanitation. After her father passed away, she helped by fetching water 3 times a day through unsafe and exhausting conditions, leaving her little time to study. Through the A+ Successor Project, new taps were installed at her school and village, allowing her to spend more time in school. Through the SIMAid Club, Sally now teaches her community about hygiene and sanitation. She also teaches to live, learn and become a pilot.
