

**Sisilia, a 13-year-old girl from remote northern Tanzania, faced many challenges including poverty, unsafe water and poor sanitation. Her father died when she was just a baby so Sisilia would help her mother by fetching water three times day from a canal, sometimes through treacherous conditions.**

**Despite the risks and hardships, Sisilia remains determined to succeed. Through the A+ Successor Project, Sisilia joined a SWASH club where she learned about hygiene, sanitation, child rights and can now share her knowledge of water and hygiene with her family and community.**

Photo: Caritas Australia

**Through the project, her school and village now have access to clean water taps, giving her more time to study. Sisilia dreams of becoming a pilot and building a better life for her family in a safer, bigger home.**

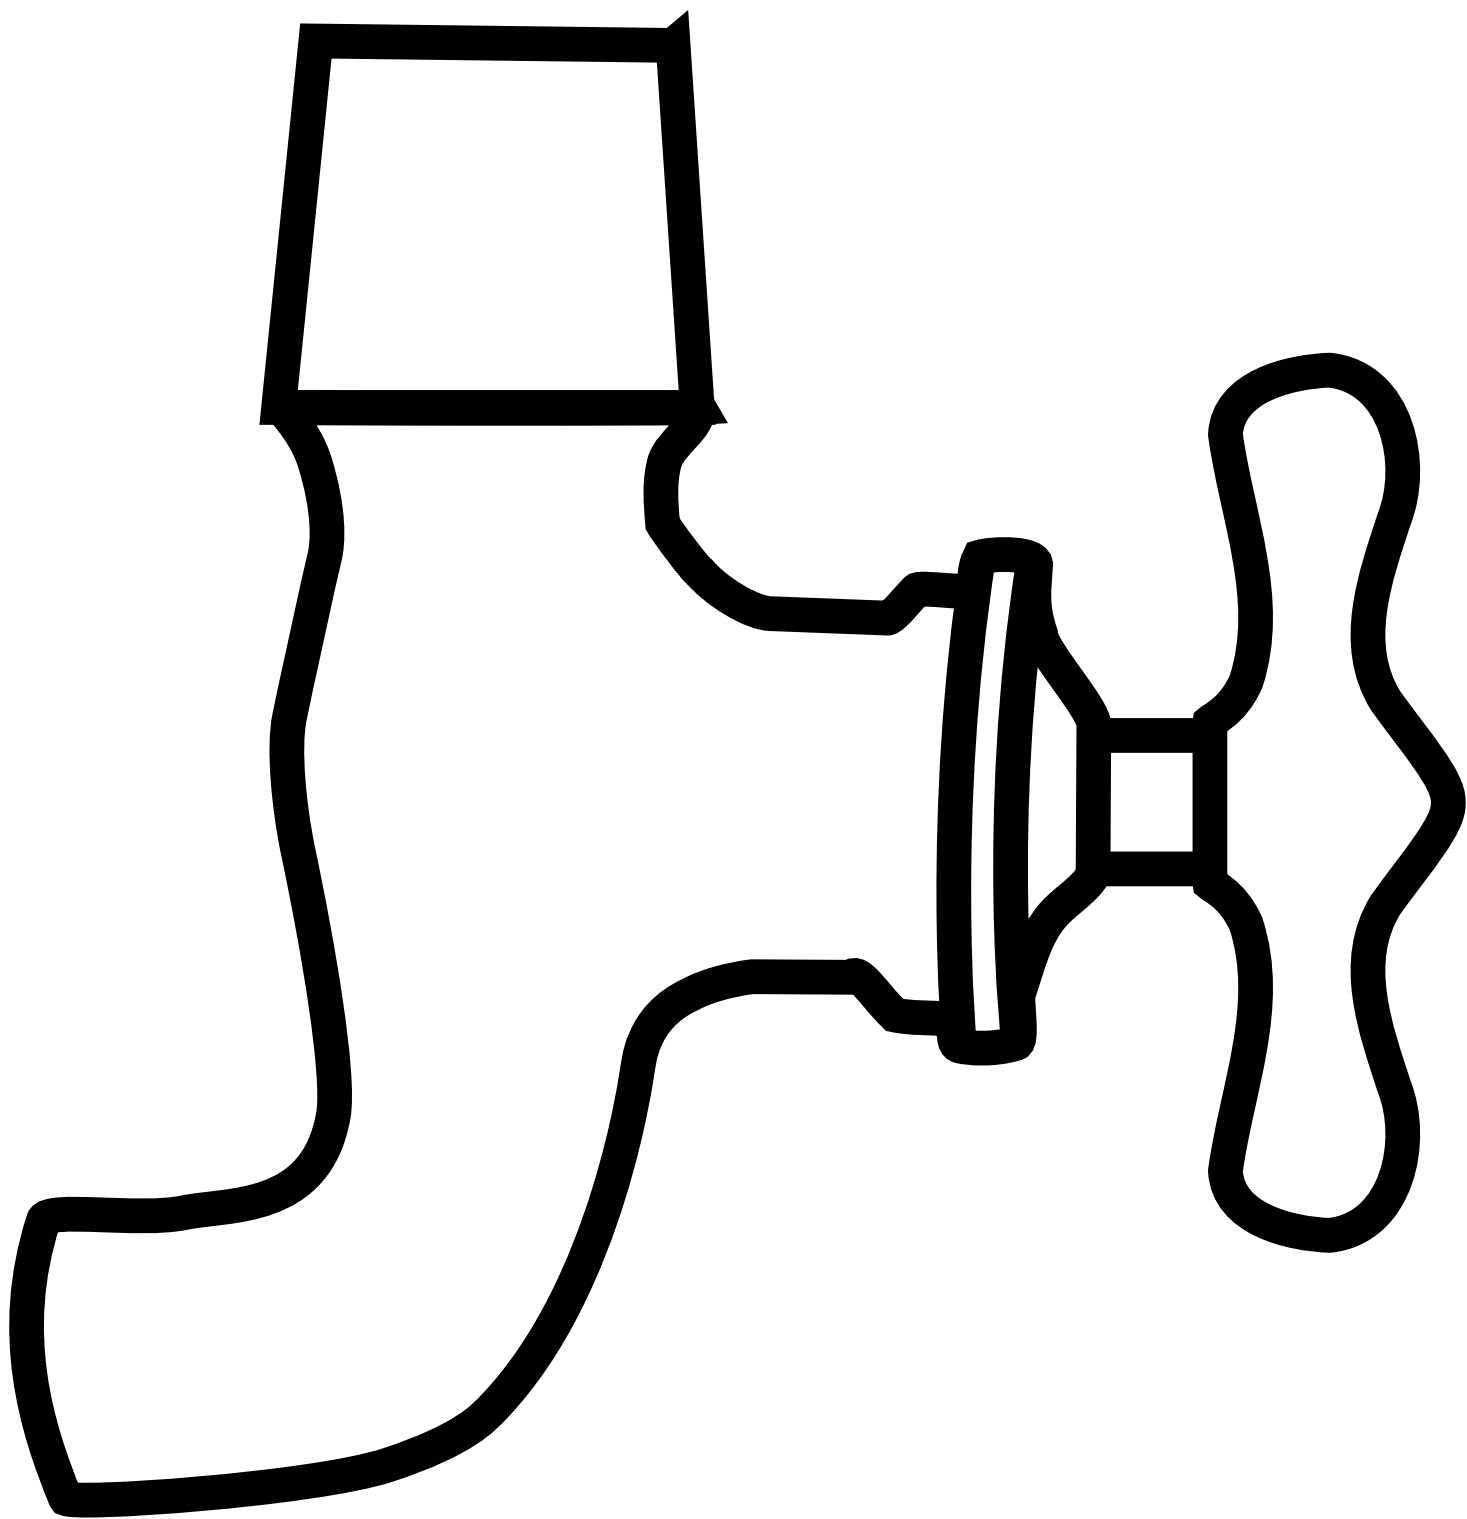

To help inspire fundraising, create a Tapitas Water Wall with a picture of a tap at the top and water droplets cascading down. Students donate \$5 for each droplet. They can write their name, and even add a prayer if they choose, before adding their droplet to the display wall. If you have a large school, you might have a different 'tap' for each grade or house.

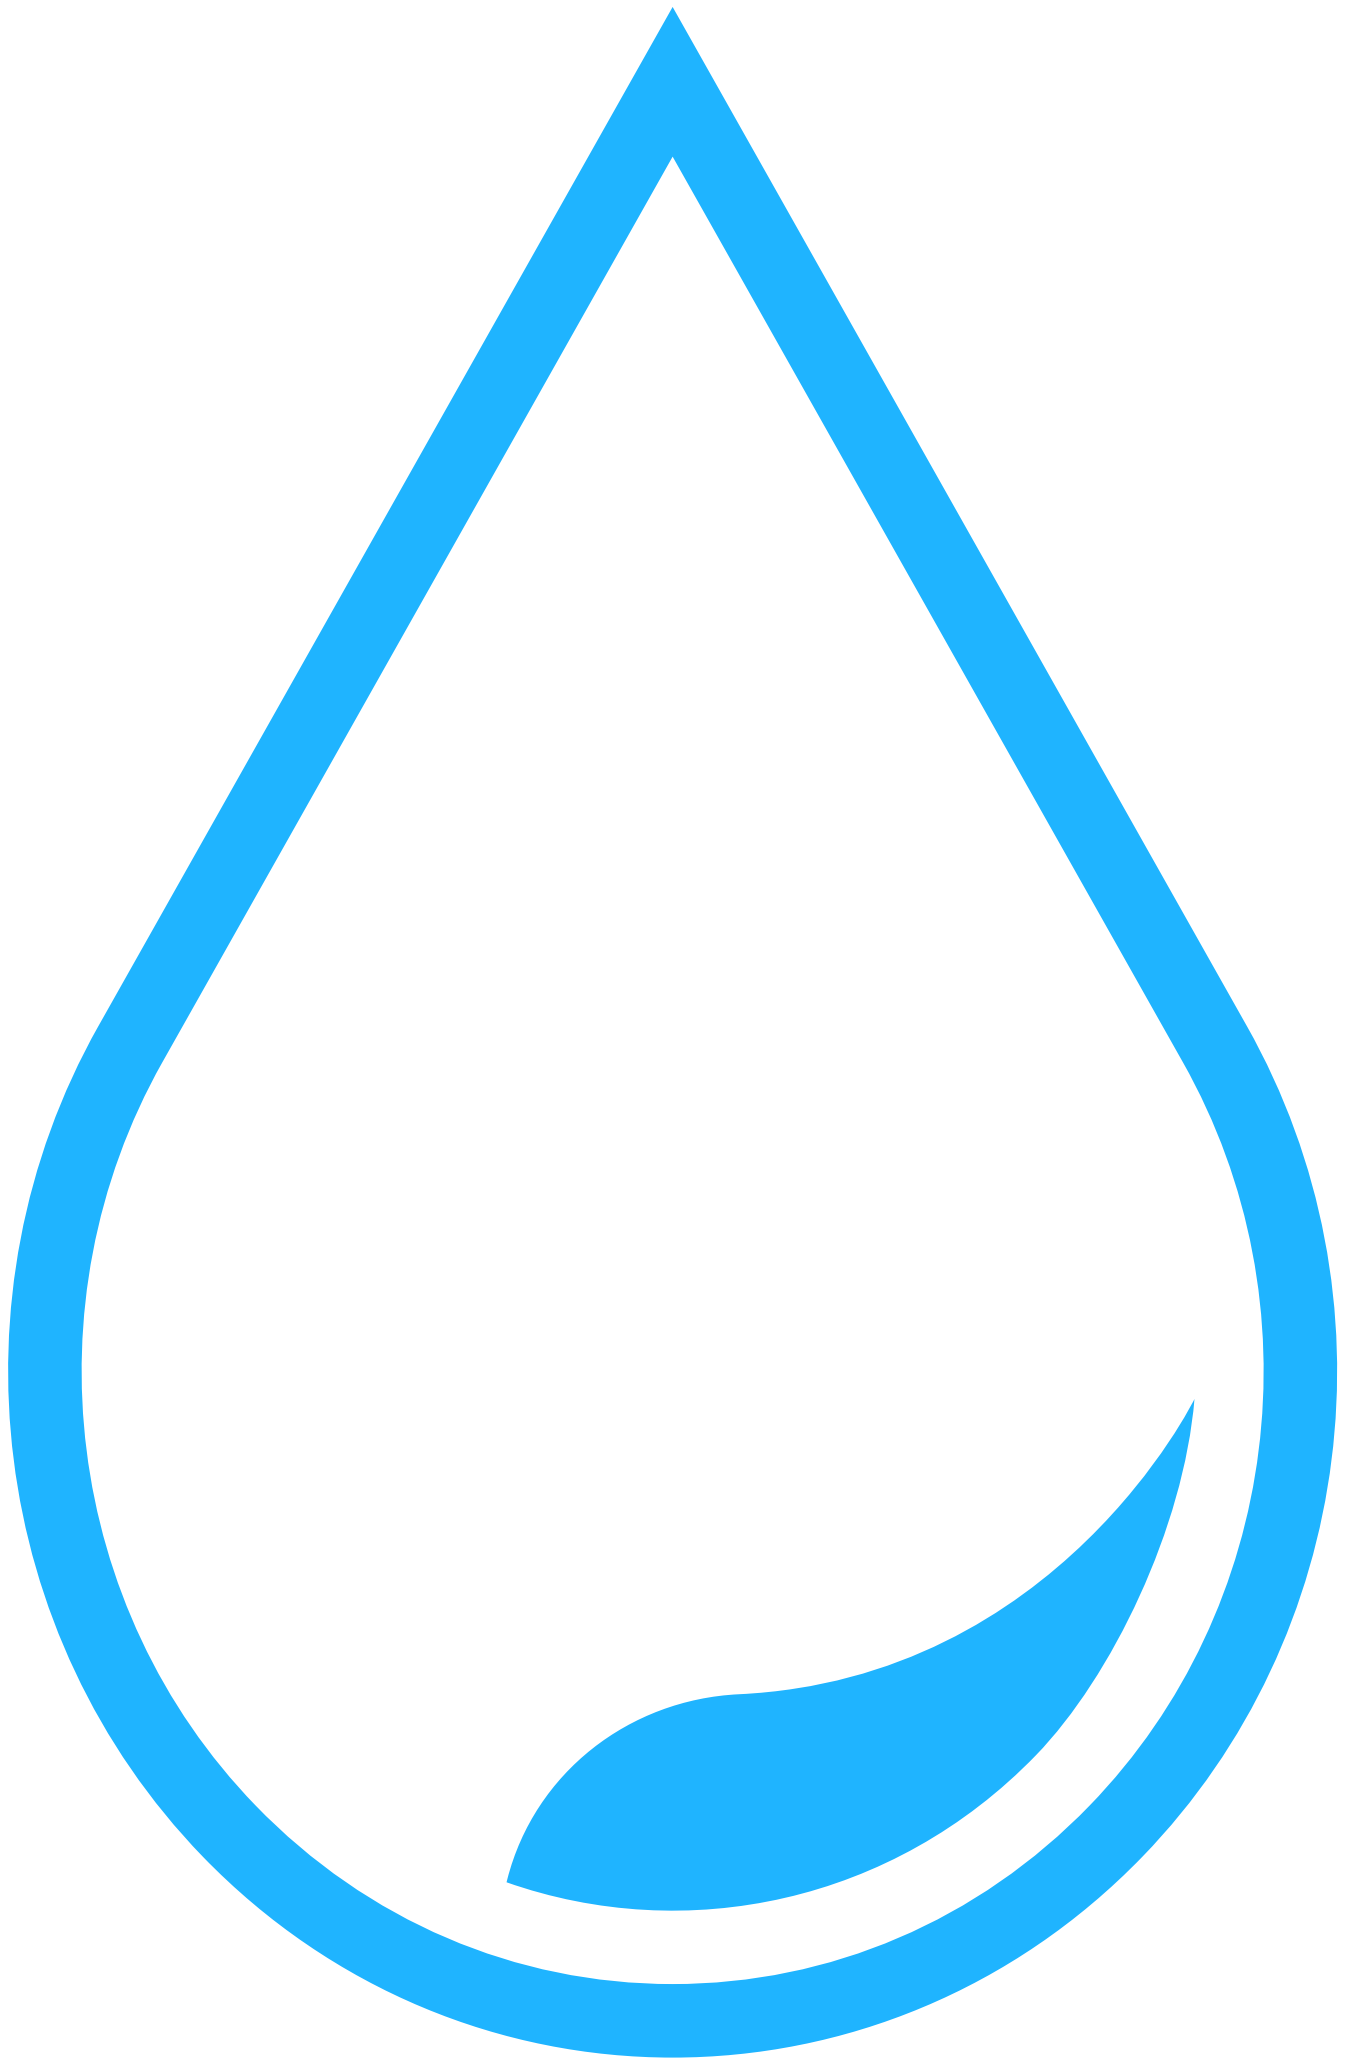

Don't forget to share a photo of your water wall with us! Email: [projectcompassion@caritas.org.au](mailto:projectcompassion@caritas.org.au)
