TATI, INDONESIA

LOWER PRIMARY

Where do you live? Do you live in the city or the country? Are you living in a house, an apartment or something different? This story is about Tati who lives in a small village in the middle of a rainforest in Indonesia.

Tati (pronounced tut-tee) lives in a village deep in the rainforest. The village is very hard to get to and they often do not have electricity and phone service. Over 28 million Indonesians still live below the poverty line, that is more people than in all of Australia.

Before Tati joined the Caritas program, she and her husband tapped rubber and raised chickens to make money for her family.

Over the last few years, some communities in Indonesia have seen the forests shrink. This caused problems for the people that depend on the forest for food, fish and medicine. It is also causing problems for the animals who have lost their habitats like the endangered orangutans, rhinos and tigers.

Tati's community is making sure this does not happen to them. They are working hard to protect its rainforest for the future.

Caritas Australia, with its partners Caritas Indonesia – KARINA and the Diocesan Caritas

are working with local communities like Tati's to create new hope for a better future.

So far, 40 people, including Tati, have been trained in areas including: managing accommodation, playing traditional musical instruments and making necklaces, shawls and orangutan dolls from local resources.

Tati is now making money for her family by cooking for tourists and making souvenirs. She is able to pay for school for her children and is more confident in speaking English. Tati loves sharing her culture and traditions with the visitors.

Tati is now in charge of the cooking at the eco-tourism program and has been a role model for other women.

"I hope to continue living with fresh air, clear water, protected forest and to be able to pay for my children's education so that my grandchildren can still enjoy the forest."

- Tati

"Thanks very much to the Australian people who have helped us and donated to this program," Tati says.

Over the last few years, communities that depend upon the native forests have seen them shrink, along with habitats for endangered orangutans, rhinos and tigers. Tati's community is committed to protecting its rainforest for the future.

"People depend on the forest and the river for food, fish and medicine, as well as having a spiritual connection to it," village elder Yordanus says. "Other villages which have sold their land no longer have a river with clean water or their own land. Without the forest, their village is no longer cool, they're noticing environmental changes."
