

Through the support of the child's club at Laxmi's school, she built her confidence to successfully advocate for water taps to be installed. Now all the students have access to clean drinking water.

To help inspire fundraising, create a Tapitas Water Wall with a picture of a tap at the top and then water droplets cascading down. Students donate \$5 for each droplet. They can write their name and even add a prayer if they choose before adding their droplet to the display wall.

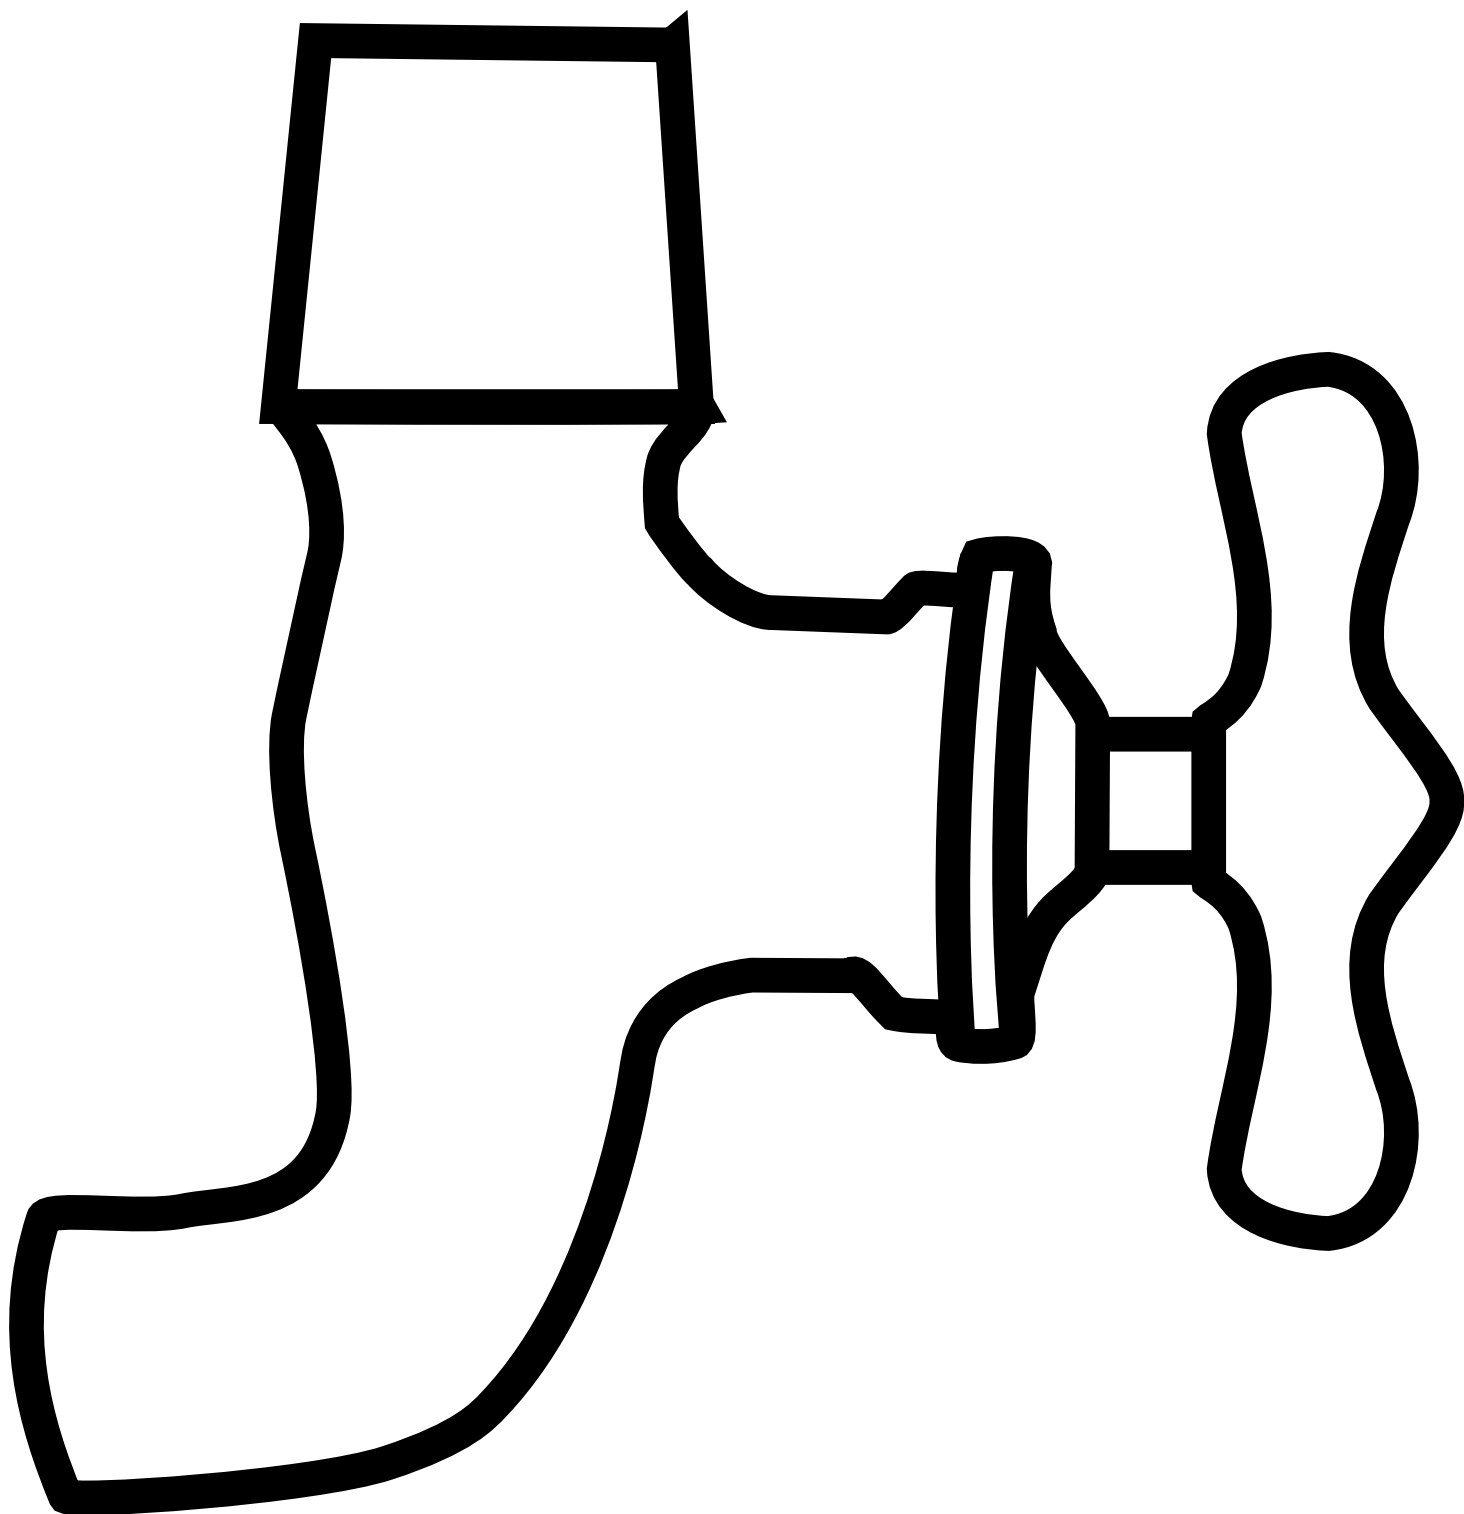

If you have a large school you might have a different 'tap' for each grade or house.

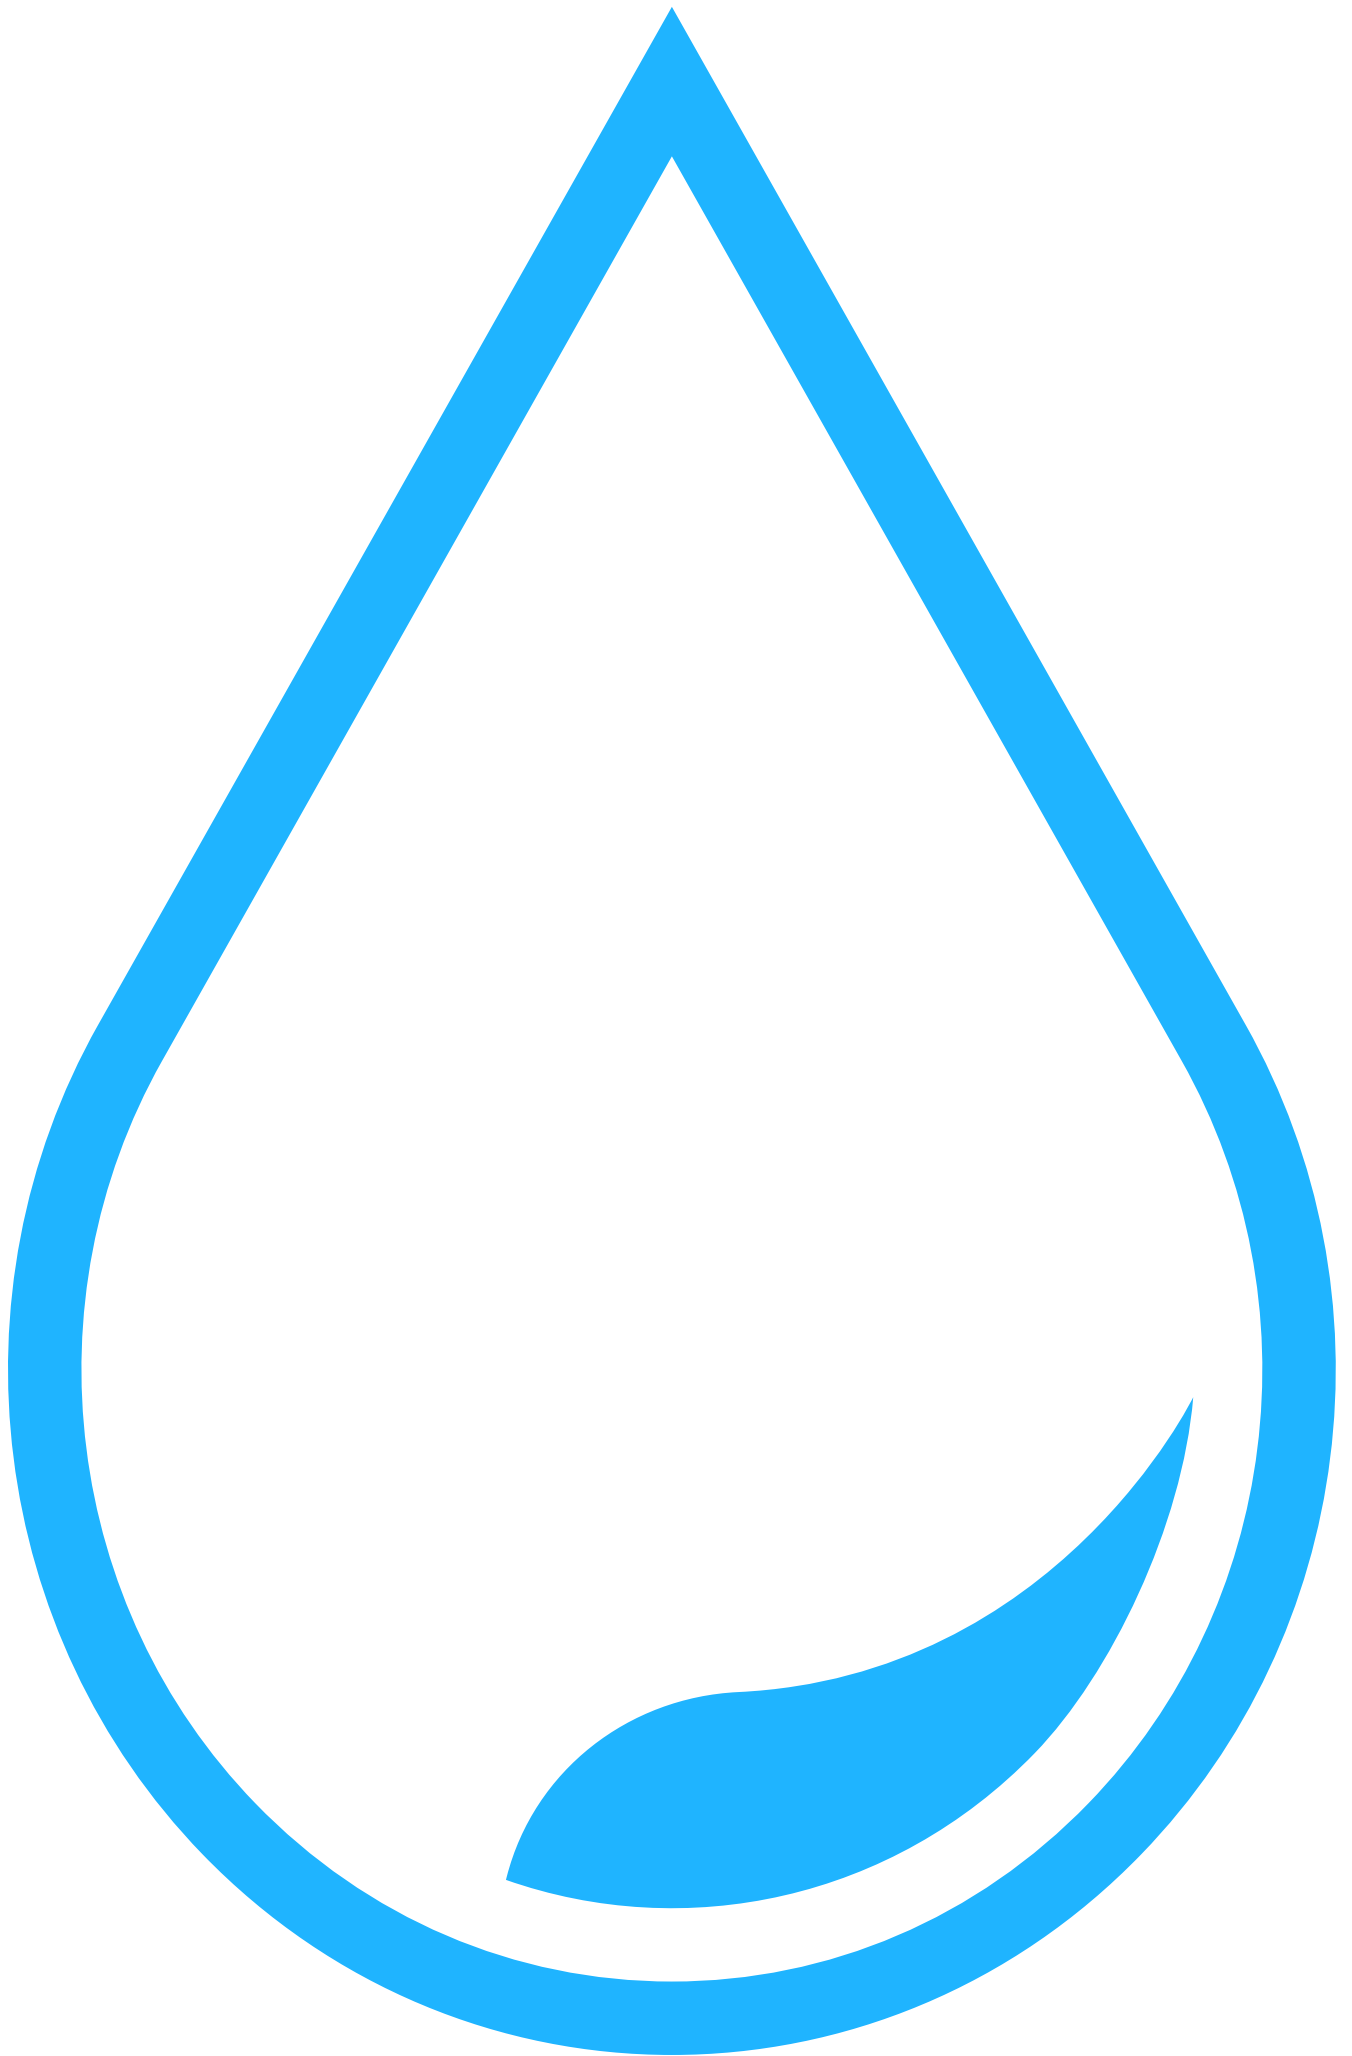

Don't forget to share a photo of your water wall with us. Email: education@caritas.org.au
