

GLOBAL ISSUES CASE STUDIES

THINGLINKS

Duration 20-30min tasks

These global case studies have been developed as **Thinglinks**. Thinglinks are interactive images which can be used as stimulus for students to explore a range of topics. These images have hot spots that include films, comprehension questions, reflection questions and other tasks.

Students can select a topic of interest, or you could direct them to an image that aligns with the current topic on which they are focussing. Simply share the relevant link with your students for them to complete independently. Answers could be recorded in a simple Word doc or posted on your online learning platform.

Some topics covered include:

- Water and sanitation
- The environment
- First Australians
- Women
- Education
- Discrimination
- Disability
- Poverty

The Thinglink interactive images have been tailored to suit varying year levels. You can send the entire library to your students using the relevant link below, or alternatively, you can send them the link to a specific image.
